

2111 - FINISHING OIL

TECHNICAL DATA SHEET | NORDICARE

Wood care

NORDICARE FINISHING OIL is an oil-based product for treatment and maintenance of indoor wooden surfaces such as beech, cherry and alder. It enhances the natural wood structure and leaves the surface with a cared-for, protective finish.

Key Benefits

- Enhances the natural grain and structure of the wood.
- Suitable for indoor wooden surfaces such as beech, cherry and alder.
- Helps protect absorbent wood from drying out and everyday wear.
- Can be reapplied as part of regular wood care and maintenance.

Application area

Suitable for indoor wooden furniture, worktops and similar absorbent wood surfaces where an oil-treated finish is desired. Always test on a small, inconspicuous area before full application, as oil treatment may change colour, gloss and surface feel.

Instructions

Ensure that the surface is clean, dry and free from dust, grease and loose residues before treatment. Apply FINISHING OIL with a cloth or brush in a thin, even layer in the direction of the wood grain. Allow the oil to penetrate, then wipe off excess oil with a clean, lint-free cloth. Repeat the treatment if required and allow sufficient drying time before use. Do not leave excess oil on the surface. Used cloths and absorbent materials may self-ignite; soak them with water and pack them air-tight in foil or a plastic bag before disposal.

Conditioning

250 ml (12 units/box)

500 ml (12 units/box)

Document control

Document no.: TDS-2111

Product: Finishing Oil

Version: 01

Revision date: 10.08.2026

Prepared by: Technical Department

Declaration

Contains: Linseed oil and hydrocarbons, C11-C14, isoalkanes, cyclics, <2% aromatics.

Safety information

DANGER

Contains aliphatic hydrocarbons. May be fatal if swallowed and enters airways. Keep out of reach of children. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.
