

215 - WOOD SOAP

TECHNICAL DATA SHEET | NORDICARE

Wood care

WOOD SOAP is a ready-to-use natural wood soap for protection and care of beech, oak, ash, pine, maple, birch and other untreated or soap-treated wood species. The product is designed for regular maintenance of wooden surface appearance is desired.

Key Benefits

- Helps care for and refresh the surface as part of regular wood maintenance.
- Maintains a natural-looking surface when excess product is removed after treatment.
- Can be used for both initial treatment and refreshment of surfaces already treated with wood soap.

Application area

For indoor wooden furniture, countertops, tabletops and similar untreated or soap-treated wood surfaces. Suitable for beech, oak, ash, pine, maple, birch and comparable wood species. If the wood is dirty, clean the surface before treatment. Always test on a small, inconspicuous area before full application, especially on sensitive, coloured, lacquered, previously oiled or unknown surfaces.

Instructions

Shake the bottle before use. Ensure that the surface is clean, dry and free from dust and loose residues. If the wood is dirty, clean it first, for example with NORDICARE Multi Cleaner, and allow the surface to dry.

Distribute an even layer of WOOD SOAP over the surface using a clean cloth. Always work in the direction of the wood grain. Let the soap sit for approximately 5-10 minutes, then polish with a dry, clean and lint-free cloth. When treating countertops, treatment on both sides is recommended where possible. Wipe away excess soap after treatment with a damp cloth and allow the surface to dry before use.

Conditioning

250 ml (12 units/box)
500 ml (12 units/box)

Document control

Document no.: TDS-215
Product: Wood Soap
Version: 01
Revision date: 10.07.2026
Prepared by: Technical Department

Declaration

Contains: <5% anionic surfactants.
Also contains: water, titanium dioxide
and benzisothiazole-3(2H)-one.

Safety information

Keep out of reach of children.
