

306 - MARBLE POLISH

TECHNICAL DATA SHEET | NORDICARE

Stone Care

MARBLE POLISH is an emulsified wax polish for treatment and maintenance of non-porous stone surfaces such as marble and similar hard stone or tile surfaces. The polish leaves a smooth, glossy wax coating that helps refresh the surface appearance and supports everyday maintenance.

Key Benefits

- Creates a smooth, glossy wax finish on suitable non-porous stone surfaces.
- Helps refresh and maintain the appearance of marble, stone and tile surfaces.
- Helps protect the surface from everyday spills when used as directed.
- Water-diluted emulsion that is easy to apply and polish by hand.

Application area

For marble and other hard, non-porous stone surfaces such as selected stone and tile surfaces where a smooth, glossy wax polish is desired.

Not intended for porous, absorbent or untreated stone where an impregnating treatment is required. Liquids containing alcohol may dissolve the wax coating and should therefore be wiped off as soon as possible. Always test on a small, inconspicuous area before full application.

Instructions

Apply the polish with a soft cloth to a clean and dry surface in an even layer. Allow the surface to dry and polish with a clean, soft cloth until the desired gloss has been obtained.

Change cloths often when polishing larger areas. For daily maintenance, wipe the surface with a damp cloth. Do not use abrasive cleaners on the polished surface.

Conditioning

250 ml (12 units/box)

500 ml (12 units/box)

Document control

Document no.: TDS-306

Product: Marble Polish

Version: 01

Revision date: 05.08.2026

Prepared by: Technical Department

Declaration

Contains: Selected waxes, silicone oil, emulsifiers, aliphatic hydrocarbons, deionized water and preservative.

Safety information

Keep out of reach of children.
