

201 - FURNITURE POLISH

TECHNICAL DATA SHEET | NORDICARE

Wood care

FURNITURE POLISH is a care and maintenance polish for polished, varnished and lacquered wooden furniture. The product helps clean the surface, reduce visible grease and finger marks, and leaves the furniture with a refreshed, polished and well-cared-for appearance. The product is suitable for regular maintenance of indoor furniture where a clean, glossy and maintained surface appearance is desired.

Key Benefits

- Refreshes dull-looking furniture and improves the overall surface appearance.
- Combines light cleaning with a polished care finish in one application.
- Helps remove everyday handling marks such as grease and fingerprints.
- Ideal for maintaining the clean, glossy look of polished or lacquered furniture.

Application area

For indoor polished, varnished and lacquered wooden furniture such as walnut, rosewood and similar furniture surfaces. Always test on a small, inconspicuous area before full application. Do not use on untreated, raw or highly absorbent wood unless suitability has been confirmed by testing.

Instructions

Ensure that the surface is clean, dry and free from loose dust before treatment. Apply a thin layer with a soft, dry cloth and rub gently until visible grease marks or fingerprints are reduced. Allow the product to work for approximately 5-15 minutes, then polish with a clean, soft and dry cloth until the desired surface appearance has been obtained.

If too much product has been applied, wipe off excess polish with a clean cloth. Always test on a small, inconspicuous area before full application.

Conditioning

250 ml (12 units/box)

500 ml (12 units/box)
