

209 - BEESWAX

TECHNICAL DATA SHEET | NORDICARE

Wood care

BEESWAX is a soft wax produced from natural bees' wax and palm waxes for treatment and protection of wooden and leather furniture. The product provides the surface with a thin, soft wax layer that helps repel dirt and reduce drying, leaving the furniture with a cared-for and protected surface appearance.

Key Benefits

- Soft wax care for wooden and leather furniture.
- Forms a thin, wax layer that helps repels dirt.
- Helps reduce drying and supports regular surface maintenance.
- Suitable for refreshing furniture with a natural, cared-for appearance.
- Easy application with a soft cloth followed by polishing.

Application area

For indoor wooden and leather furniture where a thin wax care layer is desired. Soiled surfaces should be cleaned before treatment; wooden surfaces can be cleaned with NORDICARE OIL SOAP and leather surfaces with NORDICARE LEATHER SOAP. Certain leather types are not suitable for wax treatment. Always test on a small, inconspicuous area before full application.

Instructions

Ensure that the surface is clean, dry and free from dust, grease and loose residues before treatment. Apply BEESWAX with a soft cloth in a thin and even layer. Polish with a clean, soft cloth until the desired surface appearance has been obtained. Do not apply excess wax, as this may leave the surface uneven or greasy. Repeat the treatment if the surface remains dry or insufficiently treated after the first application.

Conditioning

250 ml (12 units/box)

500 ml (12 units/box)

Document control

Document no.: TDS-209

Product: Beeswax

Version: 01

Revision date: 10.07.2026

Prepared by: Technical Department

Declaration

Contains: Natural waxes and hydro-treated petroleum distillates.

Safety information

DANGER

Contains aliphatic hydrocarbons. May be fatal if swallowed and enters airways. WARNING: Keep out of reach of children. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.
