

212 - WAX OIL

TECHNICAL DATA SHEET | NORDICARE

Wood care

WAX OIL is a care and finishing product for oil- or wax-treated wooden surfaces. The product helps refresh the surface, enhance the wood structure and leave the wood with a silky, well-maintained finish. The range is available in different variants such as **Bianco**, **Black**, **Grey**, **Brown** and **Antique**.

Key Benefits

- Refreshes the surface and enhances the natural structure of the wood.
- Helps maintain the wood surface against everyday wear, dirt, moisture and drying out.
- Leaves a silky, cared-for finish without creating a heavy lacquer-like surface film.

Application area

For indoor wooden furniture and similar wooden surfaces with an existing oil or wax finish. Suitable where a wax-oil finish is desired and where the surface colour should be maintained, refreshed or adjusted with the selected variant. Not recommended for untreated, raw or highly absorbent wood unless suitability has been confirmed by testing. Always test on a small, inconspicuous area before full application, as oil and wax treatment may change the colour, gloss or surface feel of the wood.

Instructions

Ensure that the surface is clean, dry and free from dust, grease and loose residues before treatment. Select the correct WAX OIL variant for the desired finish and apply in a thin and even layer. If applied in a thin layer, polishing is normally not required. If applied with a brush, allow the product to dry for approximately 20-30 minutes and then polish with clean, dry cloths until the desired surface has been obtained. For coloured variants, work evenly across the surface to avoid visible overlap or uneven colour. Drying time: approx. 24 hours. Dust-dry: approx. 2 hours.

Conditioning

250 ml (12 units/box)
500 ml (12 units/box)

Document control

Document no.: TDS-212
Product: Wax Oil
Version: 01
Revision date: 10.07.2026
Prepared by: Technical Department

Declaration

Contains: Refined linseed oil, aliphatic hydrocarbons, bees wax, carnauba wax, micro-wax, lead-free siccative and anti-oxidants.

Safety information

DANGER

Contains aliphatic hydrocarbons. May be fatal if swallowed and enters airways. Keep out of reach of children. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.
